Abstract (en)  
[origin: WO2023047065A1] The present invention relates generally to the field of electrical energy storage in rechargeable secondary Li-ion batteries. More precisely, the invention relates to an anode coating for an all-solid-state Li-ion battery. The invention also relates to a method for preparing said coating. The invention also relates to an anode coated with this coating, to the method for producing such an anode, and to secondary Li-ion batteries comprising such an anode.
