Abstract (en)
[origin: GB2611536A] A packaging 1 suitable for a display screen, the packaging comprising a frame configured to enclose the top 9, first side 93 and second side 95 of the contents, and at least partially enclose the bottom 5 of the contents, wherein the frame includes means 11 suitable to lift the frame with the contents therein, and wherein the frame is configured such that the back of the contents is accessible. The frame may comprise first, second and third discrete sections configured to enclose the first and second sides and top respectively. The lifting means may be provided on the first and second sections. The third section may be configured to hold the first and second sections in position. The packaging may comprise an outer packaging configured to enclose the frame. Also, a method of lifting the frame using the lifting means.
