Abstract (en)

[origin: WO2023068636A1] An aerosol-generating device is disclosed. The aerosol-generating device comprising: a pipe part defining an insertion space and comprising a seating part extending from a lower portion and an extension part extending from an upper portion; and a cartridge configured to be seated on the seating part, wherein a lower surface of the extension part is adjacent to an upper surface of the cartridge when the cartridge is seated on the seating part, wherein the lower surface of the extension part comprises an inclined surface such that a gap between the cartridge and the lower surface is gradually increased toward an end of the extension part.
