Abstract (en)

The present invention relates to a method and a device for introducing an expandable tool (20) into a container (30). The container (30) has a container body (31) and a container neck (32). The expandable tool (20) has a body (21) and a neck (22). The method comprises the steps of:- providing the expandable tool (20) in an everted form- holding the neck (22),- providing the container (30) such that the container neck (32) and the neck (22) are arranged opposite one another. To introduce the expandable tool (20) into the container (30), the expandable tool (20) is blown into the container (30) through the neck (22).
