Abstract (en)
The invention concerns a method for off-site construction of a prefabricated construction element (100) in poured concrete (600) comprising a profile (10) embedded therein, said profile (10) defining a recessed groove (120) intended to receive a blocking device (200) for the mounting of a glass panel (300), and further concerns such a profile (10) especially configured to be embedded in poured concrete (600) of a prefabricated construction element (100) obtained by off-site construction method.
