(54) Suspension apparatus.

(57) Apparatus for suspending a foliate article is described, which apparatus comprising a rail (1) having a substantially planar first surface (5) and a projection (6) adjacent to said surface (5), the rail (1) being adapted (7) to be supported with the first surface (5) in a substantially upright position, releaseable gripping means (10) having a gripping surface (11) for exerting resilient pressure upon the first surface (5) adjacent to the projection (6), resilient spring means (11, 12, 13) for providing said pressure and, rail engaging means (12) for holding the gripping surface (11) to the rail (1) in a gripping position, in which position the spring means (11, 12, 13) cause the gripping surface (11) to exert pressure upon the first surface (5) adjacent to the projection (6).

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
