(54) **Electronic driven jacquard apparatus and cassette for use therein**

(57) An electronic driven jacquard apparatus includes a cassette (C) having a select head (8) pivotally selectable between a contacting posture contacting a select pin (N) and a non-contacting posture not contacting the select pin (N) in association with a bending movement of an operational member (9) comprised of a piezoelectric body and a retaining pin (12) providing a pivot for the select head, a jacquard machine body for fixedly sup-

porting the cassette (C) and a reciprocating mechanism for reciprocating the jacquard machine body along a longitudinal direction of the select pin. An end (N<sup>3</sup>) of the select pin (N) facing the select head (8) has a cubically convex shape whereas an end of the select head facing the select pin has a corresponding concave portion for receiving therein the cubically convex end of the select pin (N).

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 07 10 5794

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
