54 **A transportable installation for mixing concrete.**

57 A transportable installation for mixing concrete, provided with a chassis consisting of at least two portions, some components of the proper installation being accommodated in said chassis portions.

The chassis comprises parallelepiped-shaped frames ( 1, 2, 21; 1,24,27) which are transportable independently from each other and interconnectable at the building site, the external shape and sizes of said frames being equal to those of a container for freight traffic and all necessary components of a concrete supply station being accommodated in the frames.
