⑤④ **High-strength roofing products using glass fiber mats; multiply systems and glass fiber mats per se.**

⑤⑦ High strength roofing products using a novel glass fibre mat comprising uniformly enmeshed filaments, voids of about 5 to 50 microns and a bituminous material are described herein. The roofing products include shingles and are built up by multiply roofing membranes and systems. The glass fibre mats per se are also disclosed. The successive membranes (20) are adhered to each other by bituminous coatings (16, 17) and the system (30) is secured to a roof deck (14) covered by appropriate insulation (15). There is advantageously a top surface coat (18).
