(54) Apparatus for dispensing bank-notes under the control of credit cards.

57) A bank-note dispenser (motor 44) and a customer identification device 9 are disposed in a strong box 28, whereas the control unit and other peripheral units are external to it. To prevent the dispensing of bank-notes following accidental or fraudulent signals, an inhibition circuit 46, 43 disposed inside the strong box directly blocks the dispensing device independently of the control by the central unit, if the result of the identification device is negative (N).
