⑤④ **Dehydrating and filtering unit for a refrigerant circuit.**

⑤⑦ A dehydrating and filtering unit for a compression refrigerant circuit, comprising a body (1) having a first end connected to the condenser (3) and a second end connected to the vacuum service conduit (4) and to the capillary (2). The capillary (2) is intimately associated with the body (1) by means of a single solder joint (12). The end portion of the capillary (2) may be located in a seat formed on the service conduit (4). Alternatively, the service conduit (10) is integrally formed with the body (1) and formed with an opening (11) for insertion of the end portion of the capillary (2).

Application particularly in domestic refrigerators.
