54 **Process and machine with inclined axis for the pestling of products and substances of any kind.**

57 The process and the machine consist essentially in pestling products and/or substances of any kind between at least two bodies, one of them being the mortar (1) and at least one the pestle (2) by the rotation of the mortar (1) on its axis, which is inclined in order to allow the contemporaneous action of the pestle both on the bottom and the side surface, thus getting the whole pestling of the matter introduced in the mortar.
