⑤④ **Method of chemical soil solidification.**

⑤⑦ Chemically solidified soil for underpinning existing building structure (10) is formed as a continuous wall portion (22) of solidified soil together with a series of spaced buttress portions (20) of solidified soil extending outwardly from the wall portion under the building structure (10). The untreated soil present between adjacent buttress portions (20) «sticks» thereto and acts with the buttress portions (20) and continuous wall portion (22) as a single monolithic unit.
