54 **A developer mixture.**

57 A developer mixture (62) for developing an electrostatic latent image comprises magnetic carrier granule (74) having toner particles (76) adhering triboelectrically thereto. The toner particles (76) comprise a non-magnetic portion with a magnetic portion integral therewith. The magnetic portion of a toner particle (76) is from about 1% to about 10%, preferably about 10%, of the volume of the toner particle. Apparatus and method for developing an electrostatic latent image using the developer mixture are also disclosed.
