⑤④ **Sandblasting machine for the superficial cleaning of any kind of object.**

⑤⑦ The machine essentially consists in an under pressure tank (1) containing the sand, which feeds, through at least one hole (17) suitable to be closed, an ejection chamber (13) of the sand, which on that purpose receives compressed air by a feeding duct (21).

The machine includes also feeding equipments of the water which can be sent in alternative both into the sand tank (1) and, through proper plugging devices, into the feeding duct of the compressed air (21), when the hole (17) connecting the tank under pressure (1) with the ejection chamber (13) is closed.
