⑥④ **An adaptable game board.**

⑤⑦ An adaptable game board comprises a rectangular base (10) across which playing pieces are slidably movable. The game board has an upstanding surround (11) which can be integral with or alternatively separate from the base (10). A plurality of openings are formed in said surround (11) and base (10) and these openings are filled by removable inserts (12) flush with the hole edges. A plurality of sheets bearing markings representative of different competitive teams or individual sports or games are individually locatable under said base (10), or alternatively a series of bases bearing such markings are provided for individually locating within the surround (11).
