(54) **Roller guide for suspended vertical panels.**

(57) The roller guide for suspended vertical panels (1, 1') comprises a frame (6), provided with sliding wheels (7) along a horizontal rail (8) placed on the upper of a wardrobe or the ceiling of a space, and a jointing bar (10) placed between the frame and the panel (1'). In the frame there are two stops (12, 12') against which the bar (10), moved by a spring (11) placed between the bar and the frame themselves, elastically leans near two symmetric extreme positions. In these positions the jointing axis bar (10) - panel (1') is alternatively advanced or backward with respect to the jointing axis bar (10) - frame (6).
