54 **Board games.**

57 A board game of skill providing three boards adapted to be disposed vertically one above the other or laid in a line through their axes. Each board has a plurality of zones extending outward from a central region in a plurality of directions. Preferably, the zones are defined by concentric circles and radially spaced lines extending outward. Two sets of playing pieces are provided and are movable from one

zone to another zone. Thirteen pieces are assigned to each board and are only permitted to move on the board to which they are assigned. The remaining six senior pieces are permitted to move from one board to another. The layout of the board allows the pieces to move circumferentially, radially or spirally, as prescribed by the rules.
