(54) Transparent panel for curved walls in revolving doors.

(57) A stationary side wall panel (10) for a revolving door, consisting of a number of high and narrow strips (11) of flat glass, interconnected by flexible joints (12) and maintained in the desired arcuate configuration by a curved frame (13). The use of flexible joints (12) permits the panel to be shipped flat. Internal stresses in the joints are minimized by initially manufacturing the panel on a support which is curved to an arcuate shape corresponding to that of the final installation.
