54 **Ladder-mountable device.**

57 A device capable of being mounted on a ladder having hollow rungs comprises a platform or tray (3) having a first arm (4) mounted thereon adjacent one end thereof and a second arm (11) pivotably mounted thereon adjacent the other end thereof and extending below the platform or tray (3) said second arm (11) being adjustable in length and said arms (4,11) being adapted to enter the hollow rungs of a ladder. In use the first and second arms (4,11) are inserted in separate rungs of the ladder, the second arm (11) being inserted in the rung below the first arm (4).
