54 Improvements in detergent distributors for laundry washing machines.

57 A detergent distributor for a laundry washing machine comprises an actuating mechanism, the lever (17) is pivotally mounted on the frame of the machine (4) in proximity to said cam (18), and is formed with at least two diverging arms (22,23) in the shape of a fork, one of said arms being connected to said piston (16), said lever being further provided with cam follower means (21) resiliently biased into engagement with said cam, and with means (26-29) for adjusting the distance between the two arms of said fork configuration.
