54 **Toy airplane emitting bubbles of the type of soap bubbles.**

57 This toy airplane comprises a shaped body (1,2), means (48) adapted to lock the latter to a vehicle such as a bicycle, an airscrew (25) mounted rotatably on the front of the body (1,2), a pan (39) defined rearwardly and transversely to the body (1,2) and intended for containing the bubble forming liquid, arm members (45) carrying at the periphery thereof rings (46) adapted for retaining the bubble forming liquid and carried rotatably at the top of the pan (39) and transversely to the body (1,2), and a kinematic linkage interposed between the airscrew (25) and arm members (45).

| DOCUMENTS CONSIDERED TO BE RELEVANT                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                 |                                                |                                                |
