(54) **Venetian blind.**

(57) A Venetian blind to be mounted in a window casement (10) or window frame, comprising a channelled suspension rail (11) arranged horizontally at the top and mounting the operating mechanism of the blind, and two vertical guide rails (20) for the slats (12) of the blind, mounted one at each side and forming a support for the associated end of the suspension rail. This rail at one end thereof is positively engaged with one guide rail while a manually adjustable latch element (26) is provided at the other end of the suspension rail for positive engagement with the other guide rail (20).

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
