54 **End closure for liquid container.**

57 An end closure (14) for a liquid-carrying container and a blank (10) for constructing same, wherein the end closure arrangement (14) is adaptable as either a bottom closure or a top closure. It includes improved score line configurations (16, 32, 34, 36, 38, 65) for assuring that the end closure outer surface is square with the container side walls. It further includes panels which, when folded, result in a full, un-scored outer panel (40) extending completely across the end of the container.
