64 Apparatus for dispensing fluid compositions.

57 Apparatus for dispensing at least two different fluids comprising cartridge (37) having two or more separate chambers (4), (6) for containing the fluids and a neck portion (8) at one end of the cartridge through which separate passages (10), (12) extend, corresponding to each chamber.

The neck portion (8) includes a valve (18) having passages (22), (24) equivalent to those in the neck portion (8) and operating such that in a first position all passages are open and in second position all passages are closed, thereby preventing any "run on" of the fluids after use.
