(54) Device for automatically applying metal delivery mouths to packaging containers for products of fluid behaviour.

(57) This invention relates to a device for automatically applying metal delivery mouths to packaging containers for products of fluid behaviour, in which preformed delivery mouths are fed by gravity into a seat (9) formed in an arm (16) provided with a hammer (19) which applies them.

Said arm (16) is mobile alternately between a vertical position in which the mouth is received, and a horizontal position in which the mouth is applied to the container.

A unit is also provided for positioning the mouths in the arm seat (9) in a correct manner suitable for their subsequent application to the containers.
