54 Method of constructing concrete structure.

57 A concrete structure is constructed by attaching metal nets (8) to opposite sides of support members (2) to form a framework. Concrete is poured into the framework and the support member is removed after the concrete has set. The nets (8) are attached by pins (9) extending into holes in the support members (2) or by lugs (19) pressed out of the support members (2), for example.
