54 Anticollision road marker.

57 A road edge marker comprising a reflector support divided into two aligned portions (5,6) joined together by means of a hinge which allows the two portions (5,6) to shift in case of collision. The hinge consists of sleeves (7,8,27,28) fixed to said portions (5,6), connected to one another by an elastic member, such as a spring (25) or a caoutchouc tube (13), which brings them back to their original position.
