54 **Illuminated mirror assembly.**

57 A box or case having a lid (2) which has a reflective lower surface (6) forming a mirror and a hollow peripheral frame (7,50,51) extending at least partly around the mirror. The hollow frame (7,50,51) contains at least one lamp (12) each positioned between mirrors (17,18) spaced apart within a portion of the frame and directing light from the lamp (12) or lamps in the peripheral direction within the hollow frame. Peripherally-extending inner and downwardly-facing walls (50,51) of the frame are transparent or translucent whereby the or each lamp (12) illuminates the area in front of the mirror (6). The base (1) of the box contains a tray assembly, particularly for cosmetics and beauty aids consisting of a base-plate (21) having open compartments (22-25) and two tiers of relatively and independently slidable trays (30,41), each having open compartments (31, 45) in their upper faces.
