Container intended for the storage of cards.

Container intended for the storage of cards, comprising two component parts capable of interacting with each other, being a storage component (2) and an upper component (3). The storage component (2) is so executed at one of its walls (2a) as to exhibit a supporting surface (4a) intended to accommodate the edges of the cards. The upper component (3) is so executed in connection with the supporting surface (4a) as to exhibit a recess (3a) enabling cards (5) with their edges (5a) resting against the supporting surface (4a) to be so arranged as to extend through the recess (3a).
