54 **A holder for plate fuses.**

57 A holder (1) for plate fuses consisting of a shaped plate in dielectric plastic comprising two sides (1a, 1b) and one central portion (1c), said sides (1a, 1b) being provided with ribbings (11, 11b, 12, 12b) for housing and keeping in position a pair of plane metal receptacles having a wire or a plate orthogonal to the receptacle itself, the sides (1a, 1b) being furthermore foldable one towards the other so as to hold the metal receptacles, each side laterally bearing elastic elements (6) and corresponding seats (7) for blocking the sides (1a, 1b) in the closed position of the holder (1) as well as further elastic elements (5) and further corresponding seats (8) for connecting and packing two or more holders placed side by side or for connecting one or more holders to a fixed supporting structure.
