(54) **Front activated fuze.**

(57) The invention relates to a fuze, particularly an Impact Delay fuze for a bomb.

Fuze having an activating mechanism which includes a striker (10) which is retained against a spring bias (19). When released by a pulled lanyard (8) the striker (16) is forced, by the bias spring (19), to activate the fuze. In order that a fuze having a rear activating mechanism may be released by a pull from the front, the activating mechanism includes a motion reversing coupling (23,24,25) to reverse the direction of the pull.
