(54) **Method of modifying a closure member equipped with a latch or a key-operated lock and unit for use in the method.**

(57) A lock (11) fitted to a door (10) is modified by inserting an appropriate key into the lock so that a handle (12) of the key protrudes from the lock (11) and applying a control unit (14) to the door (10) to cover and engage drivingly the handle (12) of the key. The control unit (14) is responsive to a magnetically coded key (24), by means of which the control unit (14) can be set in a condition in which torque is transmitted from a knob (18) to the handle (12) of the key.
