(54) Container for pressurised liquid.

(57) A flexible bag (10) adapted for reception of a pressurised liquid, e.g. a carbonated beverage, and having a tap (15) whereby the liquid may be dispensed is enclosed within a cylindrical casing (11) at each end of which is a respective end cap (12, 13). To minimise head space in the bag (10) as the liquid is dispensed so that the liquid does not go flat or stale, one end cap (13) is movable inwardly of the casing (11). This is preferably achieved by pushing downwards on the end cap (13).
