54 **Screening.**

57 A glazing bar, primarily for security screening, is made up in composite form from a first slab (1) and a second slab (7). The first slab (1) has firmly anchored therein the head of a T section of metal, of which the stem forms a central flange (4) which engages in a slot in the second slab (7) and may be secured in position by fixing screws (13) when fully engaged, the two slabs have opposed faces which are partially covered by resilient pads (6) and (11) and which form a glazing recess for receiving the edge of a sheet of security glass or other panelling.
