㉚ **Warp stop-motion for weaving looms.**

㉛ An improved warp stop-motion for weaving looms comprises two distinct groups (11, 12) of widely spaced rows (1), positioned respectively close to the thread carrying roller (2) and close to the healds (3), in a position which can be adjusted both in height and in depth. The blades (5) of said warp stop-motion are associated to the warp yarns f by being positioned on adjacent yarns, in an alternate alignment for each group of rows.
