(54) **Illuminating mixture for illuminating canisters intended to be inserted in artillery projectiles.**

(57) The illuminating mixture for illuminating canisters intended to be inserted in an artillery projectile comprises an expander of the type of the blowing agents used in the technology of plastics. In this way it is prevented that the ashes accumulate and become compact during the combustion of the illuminating mixture and thus the ejection of the ashes from the canister is facilitated.

DOCUMENTS CONSIDERED TO BE RELEVANT			
Category	Citation of document with indication, where appropriate, of relevant passages	Relevant to claim	CLASSIFICATION OF THE APPLICATION (Int. Cl. 4)
