54 **Liftable platform device for housing and covering two motor-cars.**

57 Device having a structure for housing and covering two motor-cars, comprising a liftable and canting rearwards platform (16), with an articulated front portion (24) acting as an invitation to the ascent. The lifting and lowering is controlled by a motor unit (15) and is determined by systems of crossing and articulated levers (3, 4) provided on both the longitudinal sides of the platform (16).
