⑤④ **Apparatus for use in unblocking waste outlets and the like.**

⑤⑦ Apparatus comprises a body (1), handle (3) and a nozzle or cap (5). In order to direct fluid under pressure accurately into a waste outlet for the purpose of removing a blockage, the body (1) is hollow and has a bellows section (7) which is expansible and compressible in an axial direction. The body including the bellows is made from a plastics material. The nozzle (5) is adapted to fit on the body in one of two positions. One face (19) of the nozzle is convex and the other face is recessed to define a lip (21) and an inner co-axial shoulder which carries projections (25).
