54 Prefabricated reinforced plate-shape elements made of thermo-acoustic insulating plastic material, in particular polyurethan resin, comprising a reinforcement for at least one beam of the floor and forming parts of a one-use mold for said floor.

57 Prefabricated reinforced plate-shaped elements (1, 1a, 1b...), wherein said plate is realized out of thermic and acoustic insulating plastic material, and comprises a lower layer incorporating an inert granulated material for making easier the application of the plaster. Said elements contain a metal reinforcement (4, 5) upwardly projecting for the

connection with the base metal reinforcement of the respective plate and arranged for the construction of at least one of the reinforced concrete beams of the floor, comprising filling blocks (6) which in combination with said elements (1, 1a, 1b...) form the one-use mold that remain incorporated in the floor.
