Marks & Clerk 57/60 Lincoln's Inn Fields
London WC2A 3LS(GB)

54 Improvements in or relating to amusement apparatuses.

57 A game playing apparatus has a reader (20) for reading the code on a code carrier such as a key (40). This code is compared by a microprocessor (36) with an internally stored or programmed winning code and, if the codes correspond, an indication is provided that a prize has been won. Insertion of the key also causes a raffle voucher to be issued by a printer (21), and the apparatus selects, randomly or pseudo-randomly, one of the raffle tickets issued during a raffle cycle. The winning number is displayed on a display (4) and a pre-determined period indicated on a display (5) during which the key associated with the winning voucher must be re-inserted into the reader (20) in order to claim a prize, for which a voucher is then printed by the printer (21).

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another
document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or
after the filing date
D : document cited in the application
L : document cited for other reasons
& : member of the same patent family, corresponding
document
