54 Crash helmet with retractable elements.

57 A-crash helmet (10,16) comprises a plurality of arcuated elements (11,17) which are articulated one another at their end portions. Said elements (11,17) are shiftable from one retracted non-operative position to another open operative position in which they are spread to form a cap structure, and viceversa.

Means are further provided to positively lock said elements one another in the spread operative position.
