(54) Clamping device for clamping the end of a printing plate.

57 Clamping device (3) for clamping the end of a pressure plate to a pressure drum (1) comprising a supporting fillet (4) coupled with the drum (1) and a clamping fillet (8) fastened to the supporting fillet (4), a second clamping fillet (12) being provided which together with the first clamping fillet (8) rigidly fastened to the supporting fillet (4) bounds a gap for receiving the end of the pressure plate to be clamped, whilst the second clamping fillet (12) is movable transversely of its direction of length towards and from the first clamping fillet (8) with the aid of a rod (5) slidably in the direction of length of the second fillet (12), on which rod (5) bears the side of the second clamping fillet (12) remote from the first clamping fillet (8), whilst contacting faces of the slidable rod (8) and the second clamping fillet (12) are at an angle to the direction of displacement of the slidable rod (5).

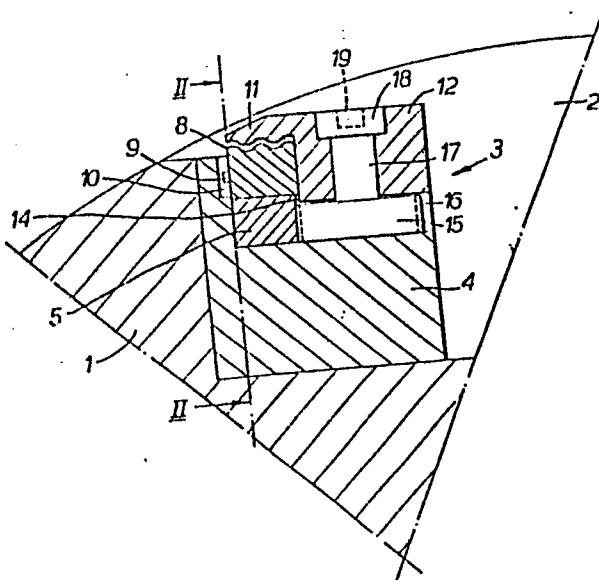

FIG. 1.

DOCUMENTS CONSIDERED TO BE RELEVANT

Category	Citation of document with indication, where appropriate, of relevant passages	Relevant to claim	CLASSIFICATION OF THE APPLICATION (Int. Cl.4)

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone  
Y : particularly relevant if combined with another document of the same category  
A : technological background  
O : non-written disclosure  
P : intermediate document

T : theory or principle underlying the invention  
E : earlier patent document, but published on, or after the filing date  
D : document cited in the application  
L : document cited for other reasons  
& : member of the same patent family, corresponding document
