54 Receiving and stacking apparatus for strips of sheet material.

㉖ In equipment for receiving and stacking in package form a continuous strip (12) of sheets or forms deposited accordionwise coming from a printer. Cutting devices (26) operate together with devices (25, 30, 31) to press the two sheets forming the pleat at which the cut will be made, and reading devices control said cutting devices in relation to a mark applied to said continuous strip (12).

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date

D : document cited in the application

L : document cited for other reasons

& : member of the same patent family, corresponding document
