54 Transmission system for motor-bogies of railway vehicles, and railway vehicles using this transmission system.

57 A transmission system for motor-bogies of railway vehicles, having a pair of spaced-apart driving axles (14, 16) driven by at least one drive motor (22, 23) supported by the body of the vehicle, and transmission means between the drive motor and each driving axle, including a coupling (26) with barrel-shaped teeth capable of allowing relative movement of each of the driving axles with respect to the drive motor.
