54 **Moistening device for shoe uppers.**

57 A moistening device for shoe uppers comprising a vapour generator (2), a sucking plant (3), moistening stations (6) arranged at different levels aligned to the staves (12) of the trolley (10), and ducts (4) connecting said station to the vapour generator and to the sucking plant. Each moistening station (6) is divided into an upper sector (8) and a lower sector (6) extending horizontally to form a passage corridor for the uppers (9) and provided with holes or slots (14) and (15) connecting the sectors to the ducts.
