54 **Store accessory for a step-ladder.**

57 The store accessory comprising a basic part (7) that can be slid over the uprights (2) of a step-ladder (1) and that can rest upon widenings (4) of the uprights (2), and an extension part (8) coupled or to be coupled to the basic part (7) by hinge means (18) and capable of being turned about a pivoting axis running parallel to the plane through the uprights (2) between a position as when used and a position in which it abuts against the uprights (2). Preferably, the basic part (7) and the extension part (8) can be connected in a detachable manner and in or above a predetermined position relative to said widenings (4).

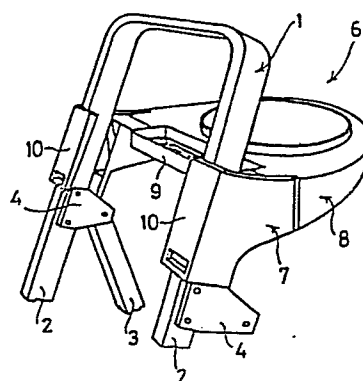

FIG. 1a.
