Birmingham B1 1TT (GB)**

54 **A button.**

57 A button is disclosed, which comprises the main body (2) of a button being provided with a cavity (9); a leg body (3) which has an inserting part (13) at the upper end of a basal part (12) through which passes an inner hole (11) extending from the lower end, and which is formed at said basal part with a meshing part (24); and a fastening body (4) being formed at its side face with a pawling part (23) which engages with said meshing part (24) and being provided erectly at its base piece with an axial rod (28) which is to be inserted into said inner hole; wherein said main body (2) of the button and said leg body (3) both are made to be fixed firmly on each other by putting said inserting part (13) adherently into said cavity (9); whereby the fitting operation of buttons is able to be done easily and quickly at a touch.
