54 **Dust exhaust/decontaminating device for palletized goods entering and/or leaving production areas.**

57 A dust exhaust/decontaminating device for glass products or other materials entering and/or leaving production areas is described. Said device comprises, inside a container (10) having at least one door (12) for introducing a support for example a pallet platform, for the materials which are to be externally cleaned, a rotating base (18), at least one blower means (14) and nozzle elements (22, 23, 24) for channelling suitably filtered pressurized air towards said support for the material to be cleaned. The pressurized jet of air is for eliminating dust particles larger than $0.3\ \mu$ and is especially effective for those larger than $2\ \mu$.
