54 **Electric connector.**

57 An electric connector comprises elongated contacts (A) and an insulating housing (B). Each the elongated contact comprises at one end a curved contact element (1) having at a front end a support piece (8) extending in a longitudinal direction of the contact, at the other end a terminal element (2), and an elastic fixing lug (9) integral with the contact and supported at one end on a side of the curved contact element by the contact at an intermediate portion (9b) thereof between the curved contact and terminal elements.
